

10 Cars Men Lust After

1. Maserati GranTurismo S

The beautiful Maserati GranTurismo coupe was launched in 2007, and in 2010 they made an even more attractive (and more expensive) version – a cabriolet. They announced they would stop making it in 2014. Maserati GranTurismo S was introduced in 2008.

This beast has a 4.7-liter V8 and 434 horsepower, reaches 62 mph in 4.9 seconds. Its top speed is 183 mph, which is more than great for a vehicle that weighs 1.8 tones.

It is one of those things that can't be described with words, so take a look at the photo, or even better – schedule a test ride if you can. It can be yours for roughly \$150,000.

2. Porsche 918 Spyder

This hybrid has a 135 kg 4.6-liter V-8 engine, and 2 electric motors. It develops 887 horsepower (608 coming from the engine and 279 coming from the two electric motors).

The Spyder is capable of developing 62 mph in just 2.5 seconds. The battery power lasts about 12 miles. Another innovation was brought in: 4 wheel steering.

The starting price is roughly \$848,000 and it's a limited edition. What else do you get for that money? Well, take a look at the photo.

3. Chevrolet Corvette C6 ZR1 – The Blue Devil

This amazing coupe comes with a 6.2-liter V-8 engine, the strength of 638 horsepower at 6500 RPM, top speed of 205 mph, and magnetic selective ride control with 2 modes: sport and tour.

This car is fairly lightweight (1.5 tones). It does look like a sports car, but at the same time it is elegant and classy.

If you want it, you can get it for \$112,000 – \$130,000.

4. Bentley

With its twin-turbo 6.75-liter V8, this machine is truly impressive. It is actually the only Bentley model with such engine and rear wheel drive. Despite its weight (2.6 tones), it feels light, fast and powerful and reaches 60 mph in 4.9 seconds. Quite good for a “heavyweight” car.

For years, Bentley has been a symbol of status and class. If you want a luxurious car, you have found it – available at the price of \$306,000.

5. Aston-Martin Rapide

The 5.9 V12 engine is just one great thing about this four-door hatchback. With 470 horsepower and capable of reaching 60 mph in 5 seconds, it is powerful enough, no matter how crazy you are. It comes with a six-speed touchtronic automatic transmission.

Its interior is as impressive as its exterior: memory seats with heating and cooling, leather, and powerful sound system.

This is not just a high quality car. It looks amazing, too. It can be yours for \$201,000.

ITALIA

6. Ferrari 458

They said this one would replace the 430 model, but they made it completely different. Better. Much better.

Pretty powerful, with 4.5-liter V8, reaches 62 mph in 3.3 seconds. Driving this lightweight car (1.4 tones) will make you feel like you're flying.

Any attempt to describe the exterior would be just a waste of time, so we are giving you a photo to enjoy. This beautiful thing can be yours for \$ 237,000.

If you can't afford it, it is best not to look at it, or else you will fall in love and suffer for the rest of your life.

7. Lamborghini Aventador

For a car that only weighs 1.5 tones, Lamborghini Aventador is incredibly powerful.

With a 6.5-liter V12, reaching 60 mph in 2.9 seconds, and top speed of 217 km/h, 'the fighting bull' will leave you breathless.

And so will its price at \$400,000 – \$440,000. As for the LP 700-4 model, they announced they would produce only four thousand cars.

The production is, of course, very slow, but it's worth waiting.

8. Chevrolet Corvette C7

Besides its looks, the most impressive thing about this car is probably its engine: 6.2-litre V8 LT1 – a small block engine with three great innovations: active fuel management, variable valve timing, and direct injection. It comes either with a six-speed automatic transmission or seven-speed manual. Compared to the previous generation, there is one downside – considerably decreased luggage space.

However, this car is amazing in so many ways, and if you buy it, luggage will be the last thing on your mind.

9. Honda (Acura) NSX 2015

9. Honda (Acura) NSX 2015

This beauty is not here yet, but we are looking forward to meeting her. It is planned for 2015. The previous models came with an impressive aluminum V6 VTEC engine that Honda is famous for, and we expect the 2015 NSX to be even more impressive. Honda stopped making NSX in 2005, and after a long break, the production will start again with an amazing new model.

Honda lovers are expecting it with impatience, and so are we. They haven't revealed much about it, but the photo from the International Car Show in NY 2012 should tell you quite enough.

10. Jaguar XF Premium Luxury

If you want luxury, that is exactly what you get – inside and out. We're talking about fancy interior: leather seats with heating, touch-screen indicators to help you park the car easily, turbocharged engine, and much more.

With top speed of 149 mph and 60 mph in 6.7 seconds, it is a fairly decent car.

The price ranges between \$45,000 and \$95,000.

Describing your favorite thing: Health and Exercise Habits.

Good morning, my name is Mike Megan.

To stay healthy, I exercise – but not every day. I usually exercise 5 days a week. I also take vitamins every day.

For exercise, I usually go jogging 2 or 3 times a week. And I also walk, of course – I walk to class every day, actually. Sometimes I go biking, but I don't have my own bike, so I can only ride on weekends in the park. They rent bikes in the park on Saturdays and Sundays.

In the future, I want to have a healthier diet. Now, I live in a very small apartment with no kitchen. I eat a lot of fast food because I can't cook for myself. After I graduate, I plan to move to a bigger apartment with kitchen. I also want to buy my own bike so I can bike every day.
